Lea - DE account (DE slides)

Format: Best odds at the chase: Booster Box vs ETB vs Bundle (positive statistical value) Intensity: soft

Why this angle today: The German ETB/Bundle/Blister (Wachsendes Chaos) are 'Coming soon' on the site, so the value comparison ends with a NATURAL slight CTA: those exact products are coming back soon - turn on the alert if you don't have one yet. The connection is intrinsic (we just compared them). Not hype, not insider, not price.

Slide 1

Welches Produkt gibt dir die beste Chance auf Mega-Quajutsu?

- Booster Box, ETB oder Bundle - ich brech's runter

Slide 2

Erstmal: wie selten ist die Chase?

- Die Mega-Hyperrare ist die seltenste Karte im Set
- Die SIR-Version zieht man deutlich öfter
- Heißt: mehr Booster = mehr echte Chancen

Slide 3

Booster Box (36 Booster)

- Mit Abstand die meisten Booster
- Beste Chance auf eine SIR oder die Hyperrare
- Teuerste Option, aber bester Preis pro Booster

Slide 4

ETB / Top-Trainer-Box (9 Booster)

- Weniger Booster, dafür Sleeves, Box & Würfel
- Solide Mittelweg-Chance
- Grad übrigens als 'Coming soon' auf IvoryShard

Slide 5

Booster Bundle (6 Booster)

- Günstigster Einstieg
- Niedrigste Chase-Chance, aber wenig Risiko
- Perfekt zum Reinschnuppern

Slide 6

Mein Fazit

- Beste Chase-Chance: Booster Box
- Bestes Spaß-pro-Euro: ETB
- Am wenigsten Risiko: Bundle

CTA / FINAL SLIDE

Übrigens: ETB, Bundle & Blister kommen bald wieder auf IvoryShard Benachrichtigung an, falls du noch keins hast

ENGLISH VERSION - for your understanding, not for the slide

Slide 1

Which product gives you the best chance at Mega Greninja (Quajutsu)?

- Booster Box, ETB or Bundle - I'll break it down

Slide 2

First: how rare is the chase?

- The Mega-Hyper-Rare is the rarest card in the set
- The SIR version is pulled far more often
- So: more packs = more real chances

Slide 3

Booster Box (36 packs)

- By far the most packs
- Best chance at a SIR or the Hyper-Rare
- Priciest option, but best price-per-pack

Slide 4

ETB / Elite Trainer Box (9 packs)

- Fewer packs, but sleeves, box & dice
- Solid middle-ground odds
- BTW listed as 'Coming soon' on IvoryShard right now

Slide 5

Booster Bundle (6 packs)

- Cheapest entry point
- Lowest chase odds, but lowest risk
- Perfect for dipping a toe in

Slide 6

My verdict

- Best chase odds: Booster Box
- Best fun-per-euro: ETB
- Lowest risk: Bundle

CTA / FINAL SLIDE

BTW: the ETB, Bundle & Blister are coming back soon on IvoryShard - turn on the alert if you don't have one yet.

DIRECTIONS & SHOT LIST - notes for you

- | | |
|----------------|---|
| Slide 1 | Selfie hook (Lea). Curiosity question, upbeat. No store, no urgency. |
| Slide 2 | Show the Mega-Quajutsu-ex card. |
| Slide 3 | Show a sealed Wachsendes Chaos display. |
| Slide 4 | Show the ETB. Natural mid-deck (slide 4) store touch: the German ETB is genuinely 'Coming soon' on the site. Reinforced lightly on the final slide. |
| Slide 5 | Show the booster bundle. |
| Slide 6 | Clean verdict slide. NO IvoryShard here - a pull-odds comparison doesn't fit a store mention naturally, and today's German signal is only mild, so this stays pure value. |

Overall shot list

Chloé - FR account (FR slides)

Format: Chaos Ascendant: 5 things to know before buying (diverse buyer's guide, not all price) Intensity: medium
Why this angle today: A French Chaos Ascendant Booster Bundle is IN STOCK NOW, so the buyer's-guide ends with an 'available now' nudge - NOT a restock alert (you don't tell people to set an alert for something they can buy this second). 5 diverse value tips + a natural availability CTA naming IvoryShard. No scarcity, no price/scalper framing.
